Chapter 1 Operation Instructions

1.1 Open & Close the Unit

The cover of the unit is designed loose-leaf, it is convenient and easy to open or close the unit.

1.2 About Power Supply

This unit is powered by two 3A batteries. If the unit doesn't work properly, which indicates battery voltage is weak, please turn off the unit and replace the batteries with new ones.

Procedures of replacing batteries:

1. Turn off the unit.
2. Push the battery compartment lock which is on the back of the unit to the position of "Unlock", open the battery compartment door and replace the used batteries with new ones.
3. Cover the battery compartment door and push the lock to the position of "Lock", otherwise, the unit can not be switched on.

Note: *Please use alkaline batteries.*

Cautions:

1. Follow the right procedures and make sure that the polarities of the batteries are correct.
2. Never leave used batteries in the battery compartment.
3. indicates the battery voltage is enough, indicates the battery voltage is weak, in this case, please replace the batteries with new ones following the information on screen.

Note: *When the adapter is in use, there will be no flag indicating the battery voltage.*

Using AC adapter:

1. Press 開關 to turn off the unit before plugging the AC adapter.
2. After using, press 開關 to turn off the unit before unplugging the AC adapter. If the unit hangs because of improper use, simply take out the batteries and replace them again. (Please use RESET if necessary.)
3. Specifications of the AC adapter:

Hong Kong	Input :	AC 220V	50Hz
	Output:	DC 6V	350mA

Taiwan	Input :	AC110V	60Hz
	Output:	DC6V	350mA
U.S.A	Input :	AC110V	60Hz
	Output:	DC6V	350mA

4. You are highly recommended to use the AC adapter provided by our agency or other qualified brands. We assume no responsibility for any damage to the unit arising through the use of AC adapters which do not meet the specification mentioned above.
5. To keep the real-time clock in the unit working properly in case of a sudden power cut, please always keep good alkaline battery in the unit even if you are using an AC adapter.

Data recovery

1. The unit is able to recover the lost data caused by sudden power cut while preparing to save. Don't cut power, reset the unit or open the battery compartment in the process of making data recovery, otherwise, all the data will be lost permanently.
2. We strongly suggest the use of alkaline battery with sufficient power supply to prevent from sudden power cut which may result in data loss. Please make sure that there is steady electrical current, 6 volt power pressure and proper plugging while using adapter.

Resetting the Unit

Press (開關) after replacing batteries or press RESET because of malfunction of the unit, a message "Please wait…"appears on the screen, then shows " Time and other setting may be changed, please reset if necessary", meanwhile the system checks itself automatically, and then goes to main menu.

Special Function Keys

The followings are special function keys. You should press [SHIFT] first and then press special function key instead of pressing them simultaneously to perform corresponding function.

1. [SHIFT] + [中/英] Switch display mode between Chinese and English
2. [SHIFT] + [輸入法] View On-line help
3. [SHIFT] + [儲存] Display symbol
4. [SHIFT] + [退格] Display time (Remark: the function is unavailable in input mode or pop-up window appears)
5. [SHIFT] + [新檔] Edit record
6. [SHIFT] + [DEL] Delete record
7. [SHIFT] + [INS] Switch between inserting and overwriting
8. [SHIFT] + [Z] Set alarm in schedule

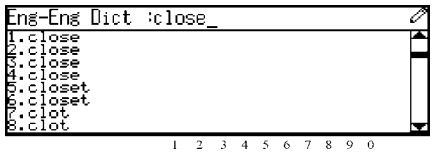
1.4 Input Methods

11 input methods are available in the unit, they are English & Number, Symbol, Cangjie, Simple, Radical, Mandarin, Taiwan, Cantonese, Wang Ma 5-strokes, 5-strokes and Strokes. Cangjie and Simple only exit in traditional Chinese mode, Wang Ma 5- stokes only exits in simplified Chinese mode.

– English & Number

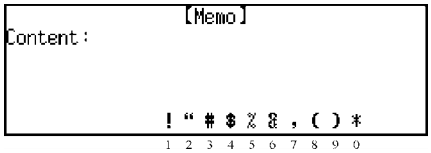
Input English word.

Press (CAPS) to switch between uppercase & lowercase.



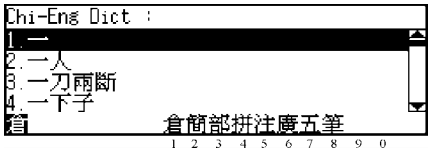
– Symbol

Press (SHIFT) + (儲存) to display special symbols, and press (←) (→) to view more, then press numeric key to select any one.



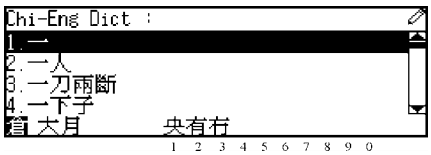
Chinese input methods

Press (說明 輸入法) to display Chinese input methods, press the relevant numeric key to select an input method, (The icon that represents the selected input method will be shown on lower left corner.)



Note: *It is available only in Chinese input mode, press (顯示 中/英) to switch between Chinese and English input mode.*

– **Cangjie** (Only exists in traditional Chinese mode)
Input the Cangjie codes of a character, then press numeric key to select a desired character from the short list on the bottom of LCD. If there is only one character which corresponds to inputted codes, it will appear on

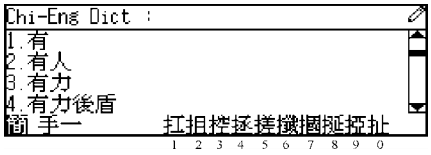


the editor; if there is not any character exists, " Not Found" will appear on screen.

Note: *Please refer to "6.1 Chart of Cangjie Input Method".*

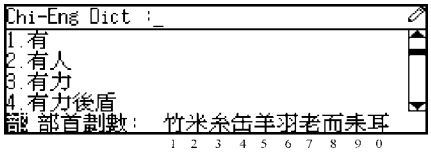
– Simple (Only exists in traditional Chinese mode)

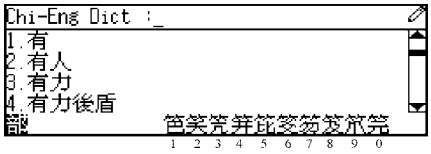
Input the first and last Cangjie codes of a character, and then press the numeric key to select any one from the short list on the bottom of LCD.



– Radical

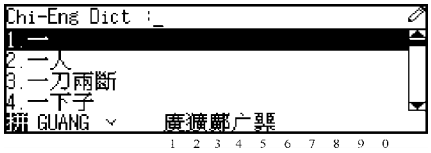
Input stroke number of the radical and press (↵輸入), then all radical will be displayed on the bottom of LCD. Press numeric key to select the desired radical, then input the number of remaining strokes and press (↵輸入). All relevant characters are displayed, press numeric key to select any one.





– Mandarin

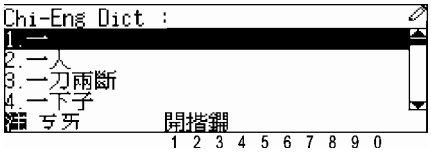
Input Mandarin phonetic alphabets and tone, then press numeric key to select any character.



Note: *Press (↵輸入) for the first tone; Press (6 、) for the second tone; Press (3 ˇ) for the third tone; Press (4 、) for the fourth tone; press (7 ·) for the soft tone.*

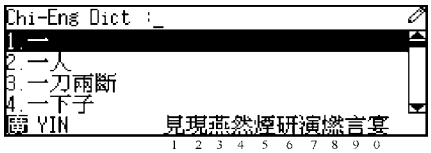
– Taiwan

Input Taiwanese Pinyin and tone (same as Mandarin), all relevant characters are displayed on the bottom of LCD, then press the numeric key to select any one.



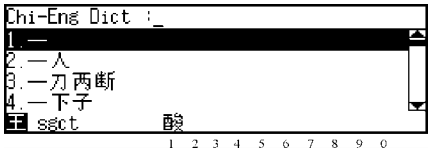
– Cantonese

Input Cantonese phonetic alphabets, all relevant characters are displayed on the bottom of LCD, then press the numeric key to select any one.



– Wang Ma 5-strokes (only exists in simplified Chinese mode)

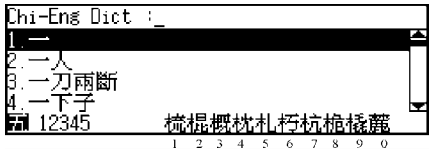
Just input the codes of first three roots and the last root of the Chinese character. If the Chinese character has less than 4 roots, input the codes of its roots and a recognition code to make it 4 codes; if this still cannot make 4 codes, use SPACE key to make the balance.



Note: *Please refer to appendix " 6.2 Chart of Wang Ma 5-strokes Input Method".*

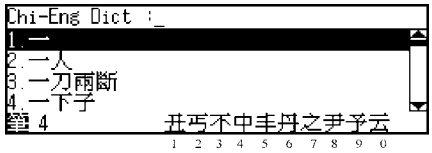
– 5-strokes

Input the codes of the first 4 strokes and the last stroke and press 輸入, then press numeric key to select any one. If the total strokes of the character are less than 5, input codes of the strokes sequentially.



– Strokes

Input the number of the total strokes and press 輸入, then all relevant Chinese characters are displayed on the bottom of LCD, press numeric key to select any one.



1.5 Automatic Power-off

– The unit will be automatically switched off if it is left idle within the automatic power-off period. Press 開關 button to restart it. (The default automatic power-off period is 3 minutes.)

– If the unit is automatically powered off, the data you have inputted or edited will not be saved.

– The alarm will still function upon the set time even if the unit is power off.

1.6 Category of Content

4 main Categories such as Dictionary, Organizer, Calculation and Others are particularly designed for your convenient operation.

– Press ▲ ▼ PGUP PGDN to highlight an item, and press 輸入 to enter the application, you can also press relevant numeric key directly.

– Press ^ v to switch into main menu of the previous or next category.

– Press 目錄 to toggle among the categories circularly.

– Press 顯示 中/英 to switch display language between Chinese and English.

1.7 Cautions

– Avoid humidity. Never let water or other liquids flow into the unit.
– Don't place the unit under direct sunlight or near heat.
– Don't repair the unit by yourself! Bring the malfunctioned unit to our Customer Service Center for repair.
– Prevent the unit from falling down on the ground, bending or strong impact.
– Don't apply strong detergent cleaning agents to clean the unit.
– Don't touch the screen with sharp-headed objects.
– Before doing reset or sending the unit for repair, please keep a copy of all important data so as to re-input them later.

1.8 Trouble-shooting

Question : Automatic power-off period is too short, can it be changed?

Answer : Enter the automatic power-off setting mode, set the automatic power-off time longer or set it to "0", if you set it to "0", the Automatic power-off will be out of function. Automatic power-off can help you save power.

Question : Why can't the inputting data be saved?

Answer : Perhaps there isn't enough memory to save data, you may delete some useless data to get enough free memory.

Question : Why can't the unit be switched on?

Answer : (1) Perhaps the battery voltage is weak, please replace a new battery.
(2) Perhaps the method of replacing batteries is wrong, please make sure that the polarities of the batteries are correct.
(3) Perhaps the battery compartment door is open, please close it.
(4) Perhaps the battery compartment lock is open, please push the battery compartment lock to the position of "lock".

Question : Why isn't the screen clear?

Answer : Please press the Display Contrast Control to readjust it.

Question : Why the volume is too small or too big, the speed is too slow or too fast?

Answer : Reset them in the system setting, or adjust the Volume Control on the left side of the unit.

Question : What should I do if I forget the password?

Answer : If you forget the password, please take the unit to the local customer service center, the staff will clear the password for you. They have the right to ask you to show your

certificate of your ownership in order to protect your data.

1.9 Specification of the Parameter

1. Flash Memory Size: 2 MBits
2. Maskrom Size: 128 MBits
3. LCD Size: 240×79 dots
4. Memory size for saving Organizer records: about 1.8 MBits

Chapter 2 Dictionary

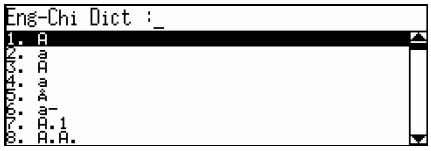
This unit provides various English/Chinese Dictionaries, and the total number of vocabulary amounts to 300,000.

2.1 English-Chinese Dictionary

The dictionary collects vocabularies both in Eng-Chi Dictionary and Oxford Dictionary. You can search an English word or phrase out by inputting them or sequential search. In details mode, you can view the phonetic alphabet, Chinese explanation and grammars. Cross-search function is available in this Dictionary. You may also listen to pronunciations of Mandarin, Cantonese and English.

2.1.1 General Search

Choose "Eng-Chi Dictionary" in the dictionary menu, input the desired word/phrase, then press (↵輸入) to confirm.



Press (▲) (▼) to choose word/phrase orderly.

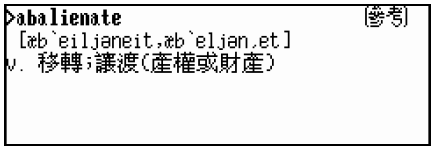
Press (^) (v) to scroll the list by page.

Note: *If there is ">" before the word, it represents that word belongs to Eng-Chi dictionary, Otherwise, the word belongs to Oxford Dictionary.*

Press (▲) (▼) to scroll the content by line.

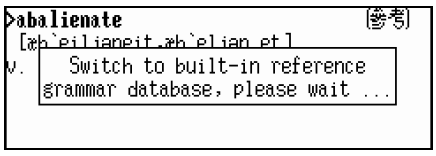
Press (9) (0) to scroll the content by page.

Press (^) (v) to view the previous/next matched

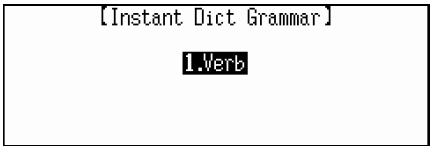


word.
Press 發音 國語 粵語 to listen to the relevant pronunciation.

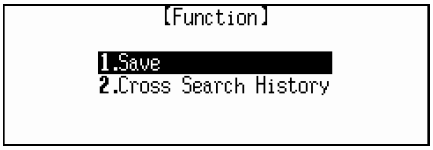
When [●●] appears on the upper right corner of the screen, press 參考 6 to view the grammar.



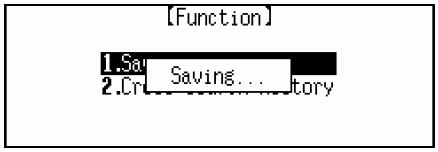
Press numeric key or 輸入 to view the Verb.



Press 功能 to enter function mode.
Press numeric key or press ▲ ▼ and 輸入 to select an item.



Choose "Save" to save record for revision and test.
You may also press 標記/符號 儲存 to save record.



In the input mode or view mode, press 查閱記錄 空格 to view the Dictionary-History List.
Press ▲ ▼ to choose record orderly.
Press ∧ ∨ to scroll the list by page.
Press 輸入 to view the details of the chosen word.

2.1.2 Spell-check & Nearest Word

These two functions are usually used when the inputted word/phrase is wrongly spelt or unavailable in the Dictionary. Spelling alternatives generated by program according to the input word or phrase will be listed for your choice.

Note: *Please refer to "2.6.2 Spell-check & Nearest word" for details.*

2.1.3 Wildcard Search

If a part of word or phrase is uncertain, input "?" or "*" to search by Wildcard Search. ("?"

represents one uncertain letter, "*" represents one or more uncertain letters.

Note: *Please refer to "2.6.3 Wildcard Search" for details.*

2.1.4 Oxford Dictionary

If the inputted word/phrase can be found in Oxford Dictionary, then the unit will enter Oxford Dictionary automatically to view the explanations of the words.

Input "apple" and press (=輸入) to confirm.
After searching, it will enter the explanation screen of Oxford Dictionary.
Press (C/CE 退出) to return to Eng-Chi Dictionary.

Note: *About other operations, please refer to "2.6 Oxford Dictionary" for details.*

2.1.5 Cross-search

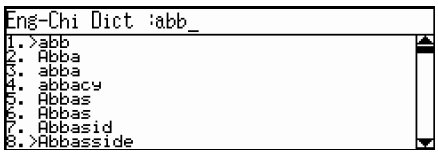
In the explanation screen, you can highlight any desired Chinese or English word/phrase to perform Cross-search function.

Note: *Please refer to "2.6.6 Cross-search for details.*

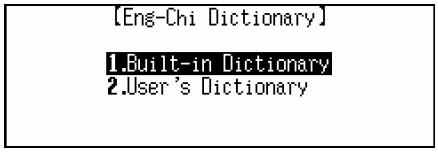
2.1.6 Eng-Chi User's Dictionary

If you have created your user-defined records in Eng-Chi User's Dictionary, you can also view those user-defined records in Eng-Chi Dictionary. (Please refer to "2.9.1 Eng-Chi User's Dictionary" for creating user-defined record.)

Input any character/phrase which exists both in Built-in Dict. and User's Dict.



Press numeric key or press (▲) (▼) and (=輸入) to choose one dictionary to view its explanation.
.



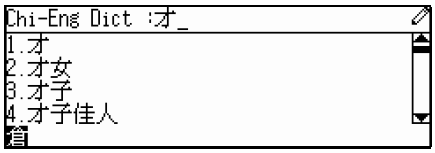
Note: *If the character /phrase only exists in Eng-Chi User's Dictionary, it will enter the user's dictionary directly to view its explanation.*

2.2 Chinese-English Dictionary

You can view English explanation for any Chinese character/phrase by inputting them or sequential search. There are 9 Chinese input methods, namely Cangjie, Simple, Radicals, Mandarin/Cantonese, Taiwan, Wangma, 5-Stroke and Strokes. You can input Chinese character by any kind of Chinese input method.

2.2.1 General Search

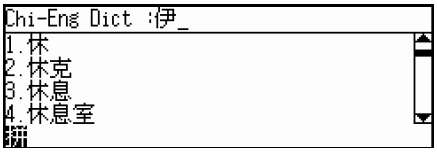
Choose "Chi-Eng Dictionary" in the dictionary menu.
Input the desired character/phrase or select it from the list, then press (輸入) to confirm.
Press (▲) (▼) to choose word/phrase orderly.
Press (∧) (∨) to scroll the list by page.



2.2.2 Nearest Word

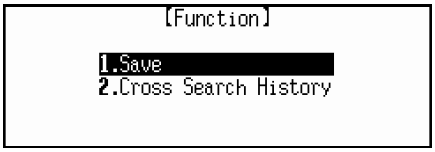
If the Chinese character/phrase inputted can't be found in this dictionary, you can choose to view the Nearest Word in the dictionary.

Input a character which is not collected in Chi-Eng Dictionary, then press (輸入) to confirm.

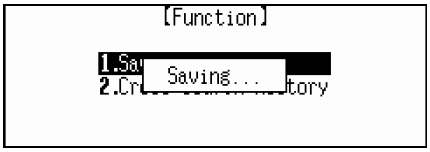


Press (▲) (▼) to scroll the content by line.
Press (9) (0) to scroll the content by page.
Press (∧) (∨) to view the previous/next matched word.
Press (發音) (國語) (粵語) to listen to the relative pronunciation.

Press (功能) to enter function mode.
Press numeric key or press (▲) (▼) and (輸入) to choose one item.



Choose "Save" to save the record for revision and test.
You also can save the record by pressing (儲存).



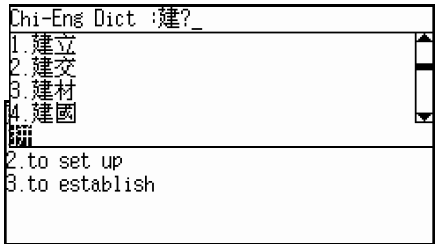
In the input mode and view mode, you can press (空格) to view the Dictionary-History List.
Press (▲) (▼) to choose record orderly.
Press (∧) (∨) to scroll the list by page.

Press (↵輸入) to view the details of the chosen record.

2.2.3 Wildcard Search

If a part of word or phrase is uncertain, input"?" or "*" to search by Wildcard Search. ("?" represents one uncertain character, "*" represents one or more characters.)

e.g. input "•?", then press (↵輸入) to confirm.



Press (∧) (∨) to view the previous/next records.

Press (C/CE 退出) to return to input mode.

2.2.4 Cross-search

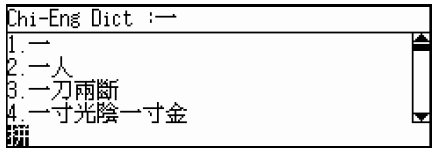
In the explanation screen, you can highlight any English word/phrase to cross-search to Oxford Dictionary, Eng-Chi Dictionary and Eng-Eng Dictionary.

Note: *Please refer to "2.6.6 Cross-search" for details.*

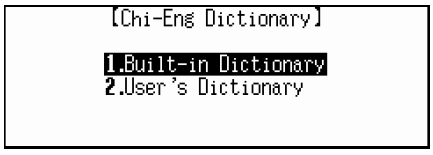
2.2.5 Chi-Eng User's Dictionary

If you have created your user-defined records in Chi-Eng User's Dictionary, you can also view those user-defined records in Chi-Eng Dictionary. (Please refer to "2.9.2 Chi-Eng User's Dictionary" for creating user-defined record.)

Input the desired character/phrase which exists both in Built-in Dict. and User's Dict.



Press the numeric key or press (▲) (▼) and (↵輸入) to choose one dictionary to view its explanation.



Note: *If the desired character/phrase only exists in Chi-Eng User's Dictionary, it will enter the user's dictionary directly to view its explanation.*

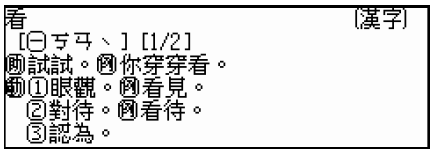
2.3 Chinese-Chinese Dictionary

You can view the Chinese explanations and other information of Chinese characters, including Taiwan, Strokes, Mandarin, Cangjie and Radicals, etc..

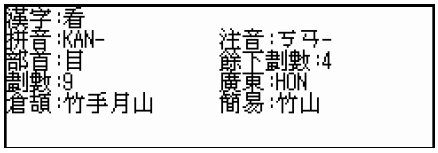
2.3.1 General Search

Choose "Chi-Chi Dictionary" in the dictionary menu.
Input the desired Chinese character, then press [輸入] to confirm.
Press [▲] [▼] to choose character orderly,
press [∧] [∨] to scroll the list by page.

Press [▲] [▼] to scroll the content by line.
Press [9 ㄋ] [0 ㄋ] to scroll the content by page.
Press [∧] [∨] to view the previous/next matched word.
Press [國語] [粵語] to listen to the relevant pronunciation.

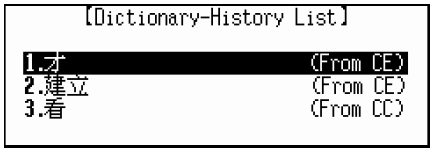


Press [7 •] to view other information of the Chinese character, including Taiwan, Strokes, Mandarin, Cangjie and Radicals, etc.



Press [C/CE 退出] to return to the previous screen.

In the input mode and view mode, you can press [空格] to view Dictionary-History List.
Press [▲] [▼] to choose record orderly.
Press [∧] [∨] to scroll the list by page.
Press [輸入] to view the explanation of the chosen word.



2.3.2 Cross-search

In the explanation screen, you can highlight any Chinese character/phrase to cross-search to Chi-Eng Dictionary and Chi-Chi Dictionary to.

Note: *Please refer to "2.6.6 Cross-search" for details.*

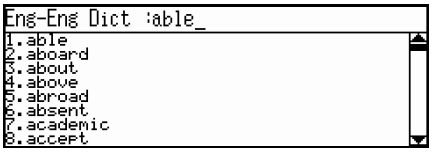
2.4 English-English Dictionary

You can search the desired English word/phrase out and view its English explanation by inputting

them or sequential search.

2.4.1 General Search

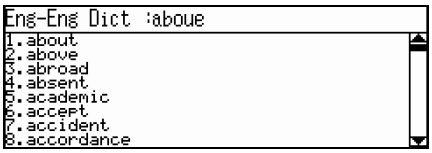
Choose "Eng-Eng Dictionary" in the dictionary menu.
Input the desired word/phrase, then press (↵輸入) to confirm.
Press (▲) (▼) to choose word/phrase orderly,
press (^) (v) to choose word/phrase by page.



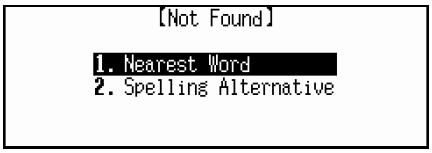
2.4.2 Spell-check & Nearest Word

These two functions are enable when the inputted word/phrase is wrongly spelt or unavailable in the Dictionary. Spelling alternatives generated by program according to the inputted word or phrase will be listed for your choice.

Input "aboue" (misspelling of "about"), then press (↵輸入) to confirm.

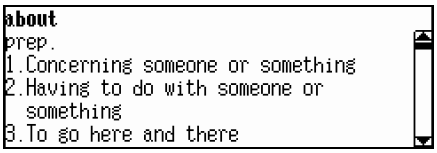


Press numeric key or press (▲) (▼) and (↵輸入) to choose "Nearest Word" or "Spelling Alternative".



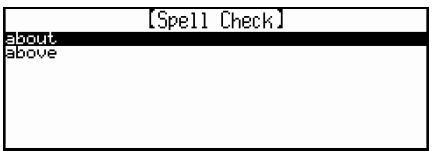
Nearest Word

If you choose "Nearest Word", you can view the explanation of the nearest word.
Press (C/CE 退出) to return to the input mode.



Spelling Alternative

If you choose "Spelling-Alternative", it will list all corrected word/phrase according to the inputted word/phrase. ("Not Found!" will be shown, if no matched word can be found.)
Press (▲) (▼) to highlight any record and press

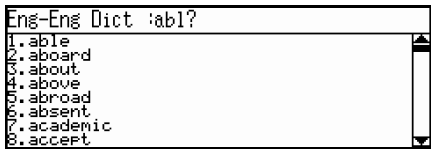


(↵輸入) to view the explanation.

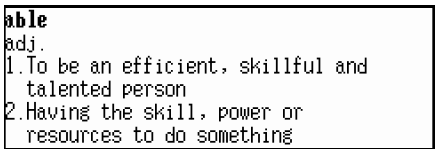
2.4.3 Wildcard Search

If a part of word or phrase is uncertain, input "?" or "*" to search by Wildcard Search. ("?" represents one uncertain letter, "*" represents one or more uncertain letters).

Input "abl?", then press (↵輸入) to confirm.



Press (∧) (∨) to view the previous/next word.
Press (▲) (▼) to scroll the content by line.
Press (9 ᵖᵍ↑) (0 ᵖᵍ↓) to scroll the content by page.
Press (發音) to listen to the English pronunciation of the headword or highlighted word.



In the input mode and view mode, you can press (空格 查閱記錄) to view Dictionary-History List.
Press (▲) (▼) to choose record orderly.
Press (∧) (∨) to scroll the list by page.
Press (↵輸入) to view the explanation of the chosen record.

.

2.4.4 Cross-search

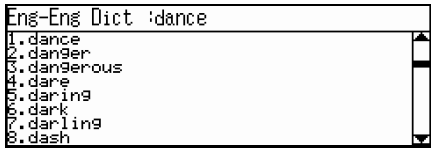
In the explanation screen, you can highlight any English word/phrase to cross-search to Oxford Dictionary, Eng-Chi Dictionary or Eng-Eng Dictionary.

Note: *Please refer to "2.6.6 Cross-search" for details.*

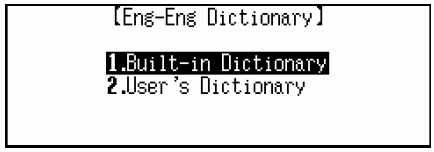
2.4.5 Eng-Eng User's Dictionary

If you have created your user-defined records in Eng-Eng User's Dictionary, you can view those user-defined records in Eng-Eng Dictionary. (Please refer to "2.9.3 Eng-Eng User's Dictionary" for creating user-defined record.)

Input any word/phrase which exists both in Built-in Dict. and User's Dict., then press (↵輸入) to confirm.



Press the numeric key or press (▲) (▼) and (↵輸入) to choose one dictionary to view its



explanation.

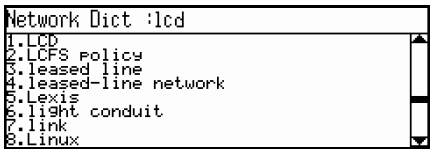
Note: *If the desired word/phrase only exists in Eng-Eng User's Dictionary, it will enter the User's dictionary directly to view its explanation.*

2.5 Network Dictionary

This dictionary collects many words used commonly in network. You can search the desired word/phrase out by inputting them or choose them from browse list.

2.5.1 General Search

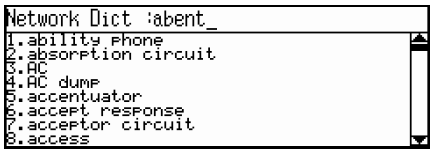
Choose "Network Dictionary" in the dictionary menu.
Input the desired word/phrase and press (↵輸入) to Confirm.
Press (▲) (▼) to choose word/phrase orderly,
press (^) (v) to scroll the list by page.



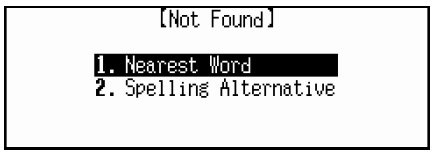
2.5.2 Spell-check and Nearest Word

These two functions are enable when the inputted word/phrase is wrongly spelt or unavailable in the Dictionary. Spelling alternatives generated by program according to the inputted word or phrase will be listed for your choice.

Input "abent"(misspelling of “abend”), then press (↵輸入) to confirm.

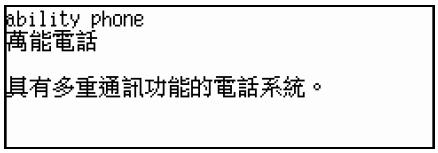


Press numeric key or press (▲) (▼) and (↵輸入) to choose "Nearest Word" or "Spelling Alternative".



Nearest Word

If you choose "Nearest Word", you can view the explanation of the nearest word.
Press (C/CE 退出) to return to input mode.



Spelling Alternative

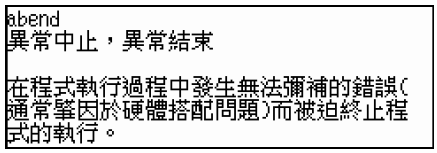
If you choose "Spelling Alternative", it will list the corrected words according to the inputted word ("Not Found!" will be shown, if no matched word can be found.)

Press ▲ ▼ to highlight any word in the list, then press 輸入 to view the explanation.
Press 退出 to return to the input mode.

2.5.3 Wildcard Search

If a part of word or phrase is uncertain, input"?" or "*" to search by Wildcard Search.("?" represents one uncertain letter, "*" represents one or more uncertain letters.)

Input "aben?", then press 輸入 to confirm, then go to the explanation screen of the first relevant word.



Press ▲ ▼ to scroll the content by line.
Press 9 0 to scroll the content by page.
Press ^ v to view the previous/ next matched words.
Press 發音 國語 粵語 to listen to the relevant pronunciation.

2.5.4 Cross-search

In the explanation screen, you can highlight any Chinese character or English word/phrase to cross-search to Oxford Dictionary, Eng-Eng Dictionary, Chi-Eng Dictionary and Chi-Chi Dictionary.

Note: *Please refer to "2.6.6 Cross-search" for details.*

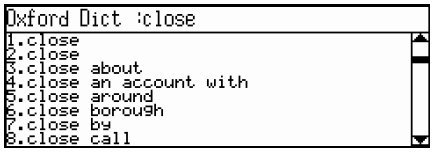
2.6 Oxford Dictionary

You can search an English word or phrase out by inputting them or select them from the browse list. In details mode, you can view the phonetic alphabet, Chinese explanation and grammars.

Cross-search function is available in this dictionary. You can also listen to pronunciation of Mandarin, Cantonese and English.

2.6.1 General Search

Choose "Oxford Dictionary" in the dictionary menu. Input the desired word/phrase and press (=輸入) to confirm.

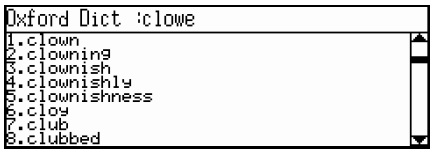


Press (▲) (▼) to choose word/phrase orderly.
Press (^) (v) to scroll the list by page.

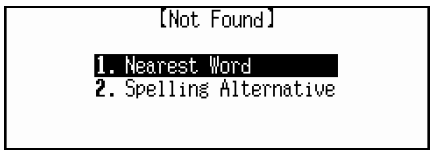
2.6.2 Spell-check & Nearest Word

These two functions are enable when the inputted word/phrase is wrongly spelt or unavailable in this Dictionary. Spelling alternatives generated by program according to the inputted word or phrase will be listed for your choice.

Input “clowe” (misspelling of “close”) then press (=輸入) to confirm.



press numeric key or (▲) (▼) and (=輸入) to choose “Nearest word” or “Spelling Alternative”.



Nearest Word

Choose “Nearest Word” to view the details of the nearest word.

Press (C/CE 退出) to return to input mode.

Spelling Alternative

If you choose “Spelling Alternative”, it will list all corrected words/phrases according to the inputted word/phrase. (“Not Found!” will be shown, if no matched word can be found.)

Press (▲) (▼) to highlight any word in the list.
Press (=輸入) to view the explanation.
Press (C/CE 退出) to return to the input mode.

Note: *The searching time may be longer, you can stop searching by pressing* (C/CE 退出).

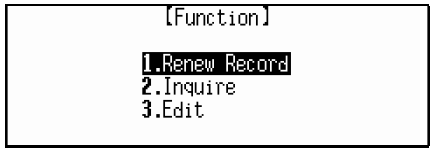
Renew Data

Press 功能 to enter function mode.

Choose "Renew Record" to renew all the data.(Press 新檔 to input new data.)

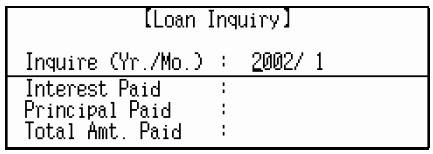


Edit

Choose "Edit" to edit the data (You can also press SHIFT + 新檔 to edit the data).

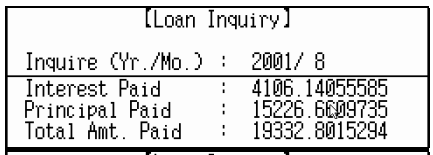
Inquire

Choose "Inquire" to look up the amount paid and loan left by a certain period of time.

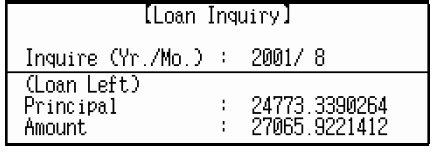


e.g. to inquire loan return by August, 2001.

Input "2001/8", press 輸入 to calculate.



Press ▽ to view the remain loan.



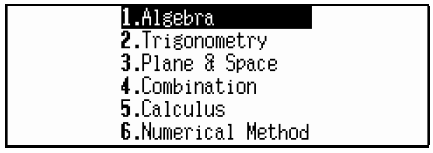
Press 功能 and choose "Inquire" to input new Year/Month to start loan inquiry.

Press C/CE 退出 to exit.

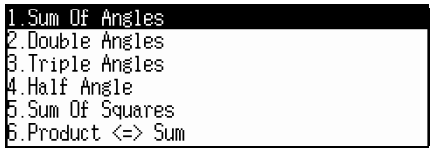
4.8 Mathematical Formulae

This function provides user with mathematics formulae on different subjects for your reference.

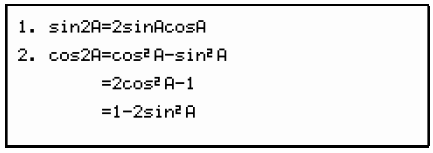
Enter "Mathematics Formula".
Press the numeric key directly or press ▲ ▼ and 輸入 to select an item.



e.g. choose "Trigonometry"
Press ▲ ▼ to search the item one by one.
Press ∧ ∨ to scroll the list by page.
Press 輸入 to view the chosen one.



e.g. choose "Double Angles".
Press ▲ ▼ to scroll the content by line.
Press ∧ ∨ to scroll the content by page.
Press C/CE 退出 to exit.

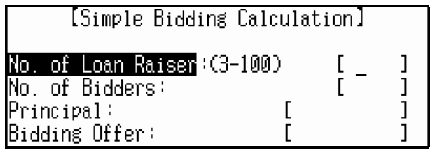


4.9 Simple Loan-bidding

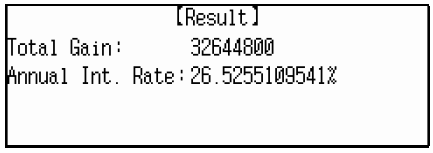
Simple Bidding Calculation can calculate the total gain and annual interest rate

of the bidding.

Input the data, press 輸入 to get the result.
After inputting an item, press 輸入 or ▼ to move cursor to the next input field.

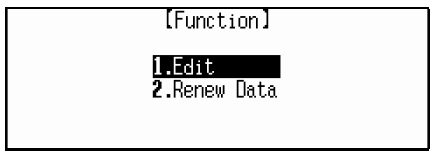


e.g. input the following data:
No. of Loan Raiser: 80
No. of the Bidders: 60
Principal: 500000
Bidding Offer: 360800
Press 輸入 to get the result.



Note: *When inputting data, press 功能 to select "Renew Data" or "Calculate" to perform the relevant function. press C/CE 退出 to clear the inputted data.*

Press 功能 to enter the Function Mode.
Press the numeric key directly or press ▲ ▼ and 輸入 to choose an item.
Choose "Edit" to edit the data.
Choose "Renew Data" to input new data.

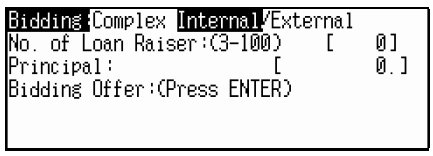


Press (C/CE 退出) to exit.

4.10 Complex Loan-bidding

Complex Bidding Calculation can calculate the total gain, annual interest rate, total Offer and return rate of the bidding.

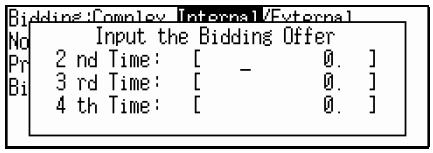
Press (DEL ◀) (INS ▶) to choose "Internal" or "External".



Press (= ↵輸入) to move cursor to the next input field.

Input the No. of Loan Raiser "5" and Principal "10000", then input Bidding Offer of each time one by one.

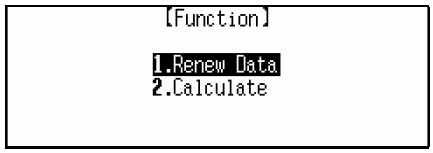
e.g. input the Bidding Offer "1000" at the second time, "2000" at the third time, "3000" at the fourth time…



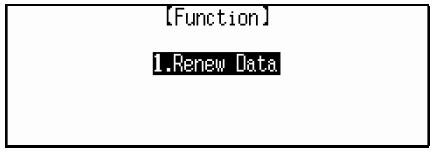
Press (= ↵輸入) to confirm after inputting.

Press (功能) to enter the Function Mode

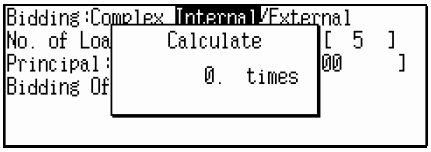
Press the numeric key directly or press (▲) (▼) and (= ↵輸入) or to select an item.



Choose “Renew Data” to input new data.

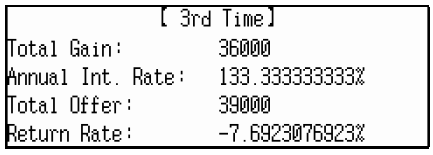


Choose "Calculate" to inquire one of the calculations.



e.g. input to inquire the third time.

Input "3", press (= ↵輸入) to calculate the total gain, annual interest rate, total offer and return rate of the third time.



Press (C/CE 退出) to exit.

Chapter 5 Others

5.1 Games

Ten fascinating games are collected in this function, which are Brick Game, Apple Chess, Snake, Shooting, Riddle, 5-Tile, Hangman, Puzzle Pipes and Mine.

Press numeric key directly or press ▲ ▼ ◀ ▶ and [↵輸入] to choose a game.

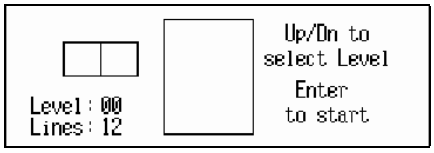
Note: If the game is locked by password set in "Game Lock", you must input correct password before entering Games.

5.1.1 Brick Game

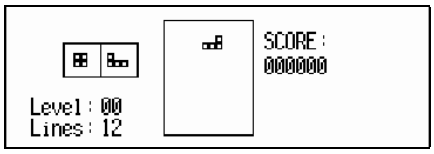
Choose "Brick Game".

Press [↵輸入] to enter the game.

Press ▲ ▼ to select a level, and press [↵輸入] to start the game.



Press [↵輸入] to rotate the brick, press ◀ to move the brick leftward, press ▶ to move the brick rightward, press ▼ to drop the bricks directly.



When a line is filled with the bricks, it will disappear completely, meanwhile the scores will be added automatically which is shown at the right top of the screen. Lines indicates the number of lines required to be filled in one-run.

Press [P↳] to pause the game, and press [P↳] again to resume the game.

Press [∧] [∨] to change the falling speed of the bricks.

Press [功能] to choose "New Game" to restart the game.

As soon as no more bricks can fall down, "Game Over" will appear.

5.1.2 Apple Chess

Choose "Apple Chess".
